Short Summary	3
What are bacteria doing on my skin?	4
MICROBIAL COMPOSITION	5
Diversity of the skin microbiome	5
Dysbiosis of the skin microbiome	6
SKIN DISEASES	7
What influence does my microbiome have on the development of acne?	7
Skin aging	8
Oxidative damage to the skin	9
RECOMMENDATIONS	10
How can I support my skin microbiome?	10-11
What can I do about acne?	12
How can I slow down skin aging?	13
Oxidative damage to the skin	14
Literature	15
Notes	16
Miscellaneous	16

Diversity of the skin microbiome (Shannon-Index)

Your Result:

Your Shannon index of 4.2 indicates high microbiome diversity suggesting a very stable microbiome.

Balance of the skin microbiome (Dysbiose-Index)

Your Result:

Your dysbiosis index with 6.1 indicates a tendency towards an imbalance in your microbiome.

Acne

Your Result:

There is generally no indication of acne in your microbiome.

Skin aging

Your Result:

Your skin microbiome suggests a slightly accelerated skin aging.

Oxidative damage to the skin

Your Result:

Your microbiome suggests that your skin is likely to age at an average rate due to oxidative stress.
