Literature	18
Notes	19
Miscellaneous	19

## Summary of results

### Diversity of the microbiome (Shannon-Index)

**Your Result:**

Your Shannon index with 1.9 indicates a slightly reduced diversity of the microbiome and likely contributes only marginally to a healthy vagina.

### Balance of the microbiome (Dysbiosis-Index)

**Your Result:**

Your dysbiosis index with 7.3 indicates a minor disruption in the balance of your microbiome.

### Endometriosis

**Your Result:**

Your vaginal microbiome suggests a minor indication of an endometriosis condition.

### Fertility

**Your Result:**

Your vaginal microbiome does not indicate infertility.

### HPV Infection

**Your Result:**

Your vaginal microbiome likely does not indicate an HPV infection.

### Fungal Infection

**Your Result:**

No fungi were found in your lady microbiome.
